

Central Nine Career Center

Donation to Center Grove High School

Engineering & Technology Dept

Rationale: The Advanced Manufacturing program at Central Nine is no longer available. The EV Grand Prix Go-Karts, a former project of that program, are no longer utilized and no other related Central Nine programs are interested in taking on this project. One of the former members of the Advanced Manufacturing Program at Central Nine is a student at Center Grove. This student has inquired with Center Grove about adopting the project, and they are willing. Therefore, it is the intention of Central Nine to donate the following items to Center Grove High School Engineering & Technology Department.

Item	Description	Qty.
Electric Go-Karts	Frame, wheels, batteries, etc.	2
Chargers	48V Chargers	2
Rib Vests	Protective Gear for Driver	2
Kart Stand		1
Red Toolbox	Full of Gears/Chain, etc.	1

These are the main components that go alongside this donation. If additional items are discovered that should accompany this project, those will also be donated to the CGHS Engineering & Technology Department.
