Figure 1 is a schematic diagram of a building layout. It shows a central corridor connecting various rooms. The rooms include a large hall, a kitchen, a dining area, a living area, a bedroom, a bathroom, and a storage room. The diagram is labeled with dimensions and room names.

PROFILE VIEW

VERTICAL ELEMENT

Figure 1 is a schematic diagram of the experimental setup. It shows a cross-section of a container with a water level. A vertical tube is inserted into the water. A horizontal tube is connected to the vertical tube. A pressure transducer is connected to the horizontal tube. A data acquisition system is connected to the pressure transducer. A graph shows the pressure signal over time.

A cross-sectional diagram of a road surface. A horizontal line represents the road surface. Below it, a rectangular area is labeled 'BASKET'. Above the basket, a curved line represents the 'TEMPORARY BASKET INSERT PROJECTION'. The area above the projection is labeled 'PUBLIC ROAD'.

[illegible]

The schematic diagram illustrates a single-phase transformer with two windings on a magnetic core. The primary winding is connected to an AC source labeled \$U\_1\$. The secondary winding is connected to a load resistor \$R\_L\$. The primary current is denoted as \$I\_1\$ and the secondary current as \$I\_2\$. The primary voltage is \$U\_1\$, the secondary terminal voltage is \$U\_2\$, and the induced EMF in the secondary is \$E\_2\$. The diagram also shows the magnetic flux \$\Phi\$ circulating through the core.
