

SEPTEMBER 2025 HIGH SCHOOL BOARD REPORT

STAFF AND STUDENT SERVICES

Staffing

We are fully staffed!

Professional Learning

This month, we are working with Instructors to prep them for Student Tours, which will take place in November. We will also review safety procedures including Armed Intruder Drills, classroom radio etiquette and testing, and a test of the page system in each classroom.

Registration for Dual Credit and Governor's Work Ethic Certification

Dual credit enrollment opened this month for all programs offering college credit opportunities, giving students the chance to get a head start on their education. Seniors were also invited to opt into the Governor's Work Ethic Certificate (GWEC) program, which will officially launch in September as students begin working toward the outlined requirements. To support this, Mrs. Aubrei Teter visited multiple programs throughout the month to share information and encourage participation.

Fall Food Truck Festival

To celebrate the end of the first quarter, we will have a Fall Food Truck Festival on Friday, October 3. Students will be able to attend the event during the regular session.

Student Services

Students also had opportunities to connect with outside partners. Representatives from the Navy and Army visited during breaks the week of August 18, while Scrub Identity was here at the beginning of the month to assist students who still needed to purchase scrubs for their uniforms. In addition, Mrs. Teter visited the Exercise Science program to present on professional dress, reinforcing the importance of preparation for future careers. Ongoing communication with students, parents, and partner high schools continues to play an important role in keeping everyone informed and supported.

Evaluation

Instructors were notified of their evaluator for the year. Mrs. Michelle Augustine is working through coaching sessions with instructors who have been at Central Nine for five years or fewer. Mr. Joe Preda and Mr. Mike Quaranta have started pre-observation conferences and the first round of observations.
