

Automotive Services vehicle removal

The automotive services program at Central Nine Career Center has 2 vehicles that are no longer useful for our curriculum.

Our **2003 Pontiac Vibe** and our **2007 Chrysler Town & Country** are no longer needed in our vehicle inventory. The Chrysler has a bad transmission, and the Pontiac Vibe is not just a shell with the engine and transmission already removed.

Removing these vehicles will also bring down our inventory number and allow us to receive future donations of newer vehicles.
