

AUGUST 2026 HIGH SCHOOL BOARD REPORT

STAFF AND STUDENT SERVICES

Staffing

We are fully staffed!

Diesel Services Program Update

Unfortunately, we were unable to secure a Diesel Services Instructor for the school year. As a result, the program has been cancelled. Students in Year 1 were offered available spots in other programs, with many students transitioning to Automotive Services or Automotive Collision Repair. We are working with Year 2 students to secure internships. These students will also work on a Concentrator course once per week., which will allow them to complete the Pathway.

Tour Committee

The Tour Committee will reconvene this month to continue planning the November 13th Prospective Student Tour Day. Visitors will follow a schedule of three classes to learn about Central Nine programs in which they are interested.

Professional Learning

This month's Professional Learning session focused on the new Teacher Professional Growth and Evaluation model. The process was broken down and explained in parts, with an emphasis on the Professional Growth Plan, which all teachers are required to submit as part of the program. Evaluators will begin scheduling pre-conferences with teachers this month.

Student Services Update

- Student Services team members have completed final beginning of the year schedule shuffles. No further changes will be made at this time.
- Recruitment for the Governor's Work Ethic Certification is happening now. Applications are due by the end of the Month. The program officially begins next month and continues through the end of April.

Evaluation

Mr. Joe Preda and Mr. Mike Quaranta are scheduling pre-conferences under the new Teacher Professional Growth and Evaluation model.
