Laura,

I would like to add this to our board agenda. We will be donating the large scale printer that was donated to us and is now at end of life.

Dr. Kovach,
I have pasted the original email from Kevin Stanton, GM of SlyFox Creative asking if we would be interested in their flatbed printer. Since it had arrived power was ran to the room it was placed we had then put in our Capitol Project for the following year the request to update our RIP software to send files not only to the flatbed printer but to all digital printers and plotters we operate and teach on.
SlyFox not only donated the printer but delivered, set up and trained me and a first year Senior, Connor Lewis, on it. SlyFox was so impressed with Connor that he is now employed by them.
After getting the electrical ran and the approval and the install of the software needed enough time had passed that the black print heads had gone bad. Having a tech out to replace them he found enough issues that he strongly suggested that we not put any more money into it.
I have contacted a former C9 student that had gone through our program who has offered to remove the printer from the building at no cost.
As unfortunate as it is that it did not last as long as we wanted it was a good experience for our students in the set up and all that comes with owning equipment this size as well as giving Connor a great opportunity. He has already become a valuable employee for SlyFox.

Kevin Stanton <kstanton@slyfoxcreative.com> Fri, Dec 6, 2024, 9:06 AM
to me, Michelle

Mr B,

Good morning, we are upgrading our flatbed printer and trading in our old one. The company said they don't want the old one and said we can sell, or it give it away, so my owner Dennis wanted me to reach out and see if C9 would be interested in us gifting it to you. This is the HP 700 (the bigger of the two flatbeds, let me know if you are interested and we can talk more.

Thanks

Kevin Stanton
